

Seamless Solutions for "Real World" Challenges

8-Inlet Multi-Component GUI and Control Software

Multiple process control & Overview on a single screen

For use with ESS GeneSys-P and Navigator™ multiple sample point selector. This software offers a GUI for pilot scale applications and controls acquisition locally for on-line remote analysers.

The modular multi-pane display allows pilot scale users to view up to 4 sample point trends simultaneously with easy full screen / minimised toggling

Multi-Pro Software

GUI and Control system for On-Line Process and Pilot Scale operations

European Spectrometry Systems Ltd.

Multi-Pro and Navigator™ allows you to realise the full power of your MS analyser and take advantage of the incredible speed of MS data acquisition.

You can run up to 8 different analyses, each with up to 16 components on 8 different sample points. All 8 sample points produce individual data files which are appended as new data is sequentially acquired to give time-spaced real time results.

You can view any 4 sample points on a single screen at the same time, a simple mouse click gives you full screen on any point or replaces a 1/4 screen panel with any one of the remaining 4 minimised sample points.

On-screen status LED's show enabled sample points and the software even handles all of your analogue I/O for you

- **8 Analyses x 8 Sample Points x 16 Analytes**
- **4 channels simultaneously displayed**
- **Data files created and appended**
- **Remote Control & I/O handled**
- **Mouse Click screen changes**
- **24/7 unattended operation**
