

Specials and Low Budget Systems

Bespoke and Special Design Systems

Bespoke Systems

From ESS Ltd

ESS will always listen to customer requests, and are pleased to offer bespoke systems that are outside our standard product range in order to fulfil the application.

If you have an application that is 'outside the norm', get in touch with us today to discuss your requirements.

Examples of the types of application areas that can be addressed are:

- **Glass Bulb gas analysis (Bulb Cracker systems) with load chamber and bulb piercer**
- **Ultra High resolution instruments for He/ D2 studies**
- **Semiconductor bubbler containers preparation**
- **Solar panel research / manufacture**
- **Glazing gas fill purity monitoring**
- **Flat screen fill gas purity monitoring**
- **High Mass range applications**
- **Safety critical applications**
- **Valve production**
- **Bottle filling on production lines / checking for trace contaminants after washing**
- **Military Systems**
- **Submarine Gas Analysis and control**
- **Low Budget Systems**

Our experts will be happy to talk to you about your application and will always endeavour to not only meet but exceed your requests.
