

# Clean Room & Containment Technologies

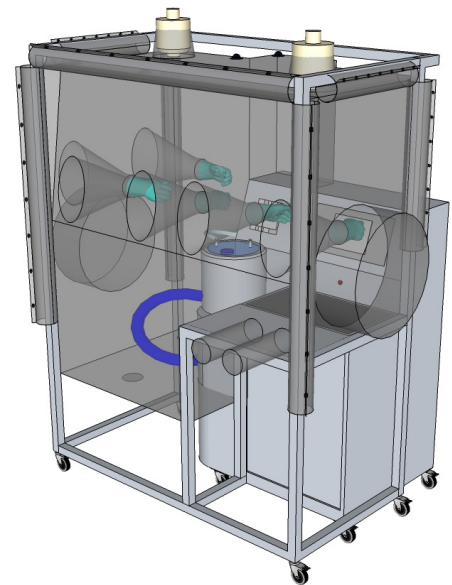

## Containment Solutions

From ESS Ltd

ESS have introduced flexible clean room / containment solutions to our product portfolio, these include plastics such as polyethylene, PVC and polyurethane film.

We are able to provide either standard or custom configurations for:

- Isolation - to ensure that a particular material does not come into contact with operators or the environment
- Containment
- Containment / Barrier Isolation combination

These products are fabricated and constructed by heat and high frequency electronic welding and computerised cutting systems, and have for many years been at the forefront of technology in flexible containment solutions for Semiconductor Clean room and Pharmaceutical applications where levels of containment below 1 micron per cubic metre are required.

Below are some examples of application areas that can be addressed:

- Fluid bed drying
- Capsule filling
- Tablet Presses
- Blister packing
- Flow booth / flow booth curtains
- Semiconductor / thin films
- Clean Room containment
